

Energy Resource Poster Project:

Your group goal is to research the energy resource you have chosen using a variety of non-fiction texts and create an informational poster. Each one of you will be graded individually on the work you produce for the group.

Project Requirements:

I. **Research:** Identify the energy resource that you will be researching.

- a) Find pictures of the energy resource that you are researching (To be put on poster).
- b) Identify the parts of US that resources are abundant (pictures/text)
- c) Discuss how these energy is formed (if applicable) (pictures/draws/text)
- d) Determine if renewable/nonrenewable
- e) Identify benefits of resource (good reasons)
- f) Identify drawbacks (problems)

II. **Discuss the Conservation of your Energy resource:**

- a.) What is the US consumption of your energy source?
- b.) How can your energy source be managed to sustain? (to meet current future energy needs)

III. **Create a one-page study guide:**

- a.) Identify the most important points that you feel students in class should come away with after viewing your presentation

IV. **Sources**

- a.) Keep a list of Sources used

V. **The Presentation**

Group Responsibility Sheet: Class _____

Each group member will be responsible for researching three of the bulleted project requirements under part 1.

- Group member research part II together
- Group members develop study guide together
- Group member make poster together
- Group members present together

Poster Topic: _____

Group member 1, Name _____
